

Jimmy Arikawe

Senior Product Designer & Design Engineer · United Kingdom · hi@jimmyarikawe.com · jimmyarikawe.com · LinkedIn · GitHub

SUMMARY

Senior Product Designer and design engineer with seven years across fintech, enterprise operations and AI. Research, interaction design and prototyping through to shipped software, including production front-end in TypeScript and React. Product Lead at Omits, owning strategy and design for a cross-border payments platform across web, iOS and Android. MSc Artificial Intelligence (Distinction), with hands-on experience prototyping against live models.

EXPERIENCE

Product Designer, Researcher & Manager · Radical Company, United Kingdom Mar 2026 — Present

- Lead design and research on client engagements, taking ambiguous business and technology problems to tested interaction models and high-fidelity prototypes.
- Build working prototypes against live LLM APIs to validate AI product concepts before engineering commits, surfacing latency and failure-state problems early.
- Established reusable patterns and research frameworks now used as the starting point on new engagements.
- Partner with engineers from exploration through implementation, owning handoff and final interaction quality.

Product Lead & Product Designer · Omits Technology, United Kingdom Jan 2025 — Jan 2026

- Owned product strategy and design for a cross-border payments platform across web, iOS and Android, from discovery to delivery.
- Cut repeat transfer time to under 60 seconds by redesigning beneficiary management and rate confirmation.
- Redesigned tiered KYC with Compliance and Risk into a progressive flow; 94% of users completed it unassisted on first attempt.
- Defined the product metrics and cross-platform design standards used by the team, and supported engineering through implementation.

Founding Product Designer & Product Manager · Persona Design, United Kingdom 2024 — 2025

- First designer at the studio, covering discovery, research, interaction and UI design across multiple client products.
- Built and maintained the shared component library that every subsequent product was assembled from.
- Translated client briefs into journeys, prototypes and production-ready design, testing flows iteratively.

Product Designer / Creative & Visual Designer · Pentagonam, London 2023 — 2024

- Designed interfaces and visual systems for enterprise and B2B technology clients within a multidisciplinary studio.
- Simplified complex user flows through research and usability exploration, producing implementation-ready design in Figma.
- Worked with writers, brand designers and strategists to build coherent visual narratives around technical products.

Senior Product Designer & Product Engineer · Engage Messaging 2022 — 2023 · Concurrent with MSc study

- Redesigned the web and mobile products, contributing to a 50% improvement in measured user satisfaction.
- Wrote production front-end alongside design, prototyping in code to validate interaction concepts.
- Grew the design system from ad-hoc components into reusable, documented patterns.

Lead Product Designer / Data & Technology Analyst · Recyclan 2020 — 2022

- Led UX and product design for an operational data platform deployed across 14+ countries.
- Designed dashboards and workflows serving three audiences: plant operators, compliance officers and business users.
- Raised product adoption 15% through research and usability testing that identified where operators abandoned the tool.

Product Designer · Analytics Intelligence

2019 — 2021 · Overlaps Recyclan — part-time

- Designed B2B SaaS analytics, reporting and operational tooling.
- Ran usability research and iterated on behavioural data.
- Built dashboard and data-visualisation patterns for dense information environments.

Junior UI/UX Designer · Filmhouse Group

2018 — 2019

- Redesigned the online cinema booking experience, contributing to a 400% increase in online bookings.
- Built responsive web and mobile interfaces with a focus on accessibility and conversion.

SELECTED WORK

Full case studies at jimmyarikawe.com/work

Omits Finance — Designing Trust, Transparency & Speed into Cross-Border Remittance

Mindgard AI Security Labs — Automated Red-Teaming & Vulnerability Assessment for LLMs and AI Models

Circula — Operations, Inventory & Impact Reporting for the Circular Economy

Voxxy.ai — Conversational AI Speech Technology & Voice Modulation Interface

Eventspad — End-to-End Event, Guest & Secure Check-In Operating System

Spot Finance — Comprehensive Mobile Fintech App for Savings, Investments & Payments

SKILLS

Design Product design · Interaction design · Design systems · High-fidelity prototyping · Figma

Research Product discovery · Usability testing · Journey mapping · Experimentation

Build TypeScript · React · Next.js · Tailwind · Python

AI LLM-based systems · RAG · Conversational UX · Human-in-the-loop workflows · Model evaluation

EDUCATION

MSc Artificial Intelligence & Applications · University of Strathclyde, Glasgow, Scotland

2022 — 2023

Distinction. Deep learning and neural networks, machine learning for data analytics, AI for finance and autonomous systems. Research project: detecting plant disease with deep learning.

BSc Electrical & Electronics Engineering · University of Lagos, Nigeria

2013 — 2018

Honours.

PUBLICATION

Tech-driven Solutions for Africa's Waste Problem — Operational telemetry and circular supply chains for waste collection and recycling in emerging markets.
